

*Bachelor of Science in
Management Information Systems
in class or online*

National-Louis University

*Bachelor of Science in
Management Information Systems
in class or online*

Management information systems have become integral to global business. New developments—such as wireless applications, web services and offshore outsourcing—ensure that information systems will continue to be one of the most dynamic and fastest growing professions in the 21st century. In fact, the Bureau of Labor Statistics reports that 8 of the top 10 fastest-growing occupations are in the technology field. As a result, there is an ongoing need for competent information systems professionals who combine strong skills in technology, business and management.

Earn your Bachelor of Science in Management Information Systems (BSMIS) degree in as little as 18 months. You'll learn to lead an information technology project, large or small. Analyze the role of technology in modern organizations from a historical, current and projected basis. Get hands-on experience with database and web development tools. Explore current methods used to mine data to target customers. Even apply what you learn in a real-life analysis and design project.

If you answer yes to at least three of the following questions, then call us at **1.888.NLU.TODAY** to find out how our BSMIS degree could help your career.

1. Have you earned at least 60 semester hours or 90 quarter hours of college-level credit? yes no
2. Do you have at least 2 years of work experience, preferably with information technology? yes no
3. Do you have the desire and aptitude to be an information systems professional? yes no
4. Are you on a supervisory track to management? yes no
5. Do you have access at home to a computer and the Internet? yes no

*Flexible scheduling means you choose what works best
for you.*

- Attend one night a week for 18 months
- Attend one weekend a month for 18 months
- Form a group at your facility
- Attend online

What's in it for you?

Complete your degree in 18 months. Minimize the elapsed time required to earn your degree by choosing our accelerated, 18-month program that builds on what you already know and has flexible scheduling options.

Qualify for a better job. Enhance your marketability by earning a valuable credential from a globally respected university.

Increase your salary. College graduates earn an average of 62% more than high school graduates, according to the US Census Bureau.

Fulfill a lifelong dream. You know where you want to be. We have the roadmap to get you there. When you enroll in this program, your entire program will be mapped out for you, from the first course to the last.

Program at a glance.
